

What is the biosphere?	On Earth, there are different conditions for the life of plants and animals. That is why plants and animals have a specific distribution in the form of belts, which have another name. Specify that name.
	

<p>How are plants fed?</p>	<p>List all the natural zones that exist on Earth.</p>
	
<p>What organisms are called "oxygen factories"?</p>	<p>Explain how natural zones alternate from the equator to the poles</p>

	
<p>What helps plants in the process of creating food?</p>	<p>Explain why natural zones alternate with increasing altitude</p>
	

What gas do plants take from the atmosphere in the process of creating oxygen?	What are tropical rainforests and what do they look like?
	

<p>When plants and animals die, which organisms decompose their remains?</p>	<p>Where do tropical rainforests occur? Show on the map of the World.</p>
	
<p>What useful trees grow in tropical rainforests?</p>	<p>Where do you think the savannahs are located? Show on the map of the World.</p>

	
What animals live in tropical rainforests?	What does the savannah look like in the rainy season, and what does it look like in the dry time of the year?
	

<p>Where are tropical rainforests distributed in South America? Show on the map.</p>	<p>What animals live in savannas?</p>
	

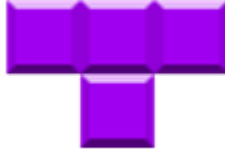

<p>Where are tropical rainforests distributed in Africa? Show on the map.</p>	<p>What's the desert? What are their features?</p>
	
<p>Why do a large number of animals living in tropical rainforests live in the treetops?</p>	<p>What are the conditions like in the desert?</p>

	
<p>What's the savannah?</p>	<p>What plants live in deserts?</p>
	

What animals live in deserts?	What animals live in subtropical forests?
	

<p>What is the name of the transitional form of the natural zone between the desert and the steppe?</p>	<p>What are steppes and where do they occur?</p>
	
<p>What are subtropical forests?</p>	<p>What natural conditions are typical for steppe areas?</p>

	
<p>Where are the subtropical forests? Show on the map of the World.</p>	<p>What are the steppes called in South America?</p>
	

Where are the largest deserts? Show on the map of the World.	What are the steppes in North America called?
 A purple icon consisting of four squares arranged in a T-shape: three squares in a horizontal row with one square centered below them.	 A purple icon consisting of four squares arranged in a T-shape: three squares in a horizontal row with one square centered below them.

<p>What plants are prevalent in subtropical forests? What are the lowland landscapes?</p>	<p>What are the steppes called in South America?</p>
	
<p>What plants live in the steppes?</p>	<p>Where are the forests of the temperate belt and what natural properties do these landscapes have?</p>

	
<p>How do plants in the steppes change through the seasons?</p>	<p>What plants live in temperate zone forests?</p>
	

What animals live in steppes?	What animals live in temperate forests?
	

<p>How do you use the steppes?</p>	<p>How do temperate forests alternate from south to north?</p>
	
<p>What are taiga? Where do they spread? Show on the map.</p>	<p>What are the natural conditions in the tundra?</p>

	
<p>What are tundras? Where do they spread? Show on the map.</p>	<p>What plants live in tundras?</p>
	

What animals live in the tundras?	What can happen to the forest?
	

<p>Where are the polar deserts? Show on the map.</p>	<p>What animals live in polar deserts?</p>
	
<p>How do natural zones alternate with increasing altitude?</p>	<p>How does it directly and indirectly affect the world?</p>

	
<p>How can man protect the living world?</p>
